PERSONAL PROJECTS

AgencyOMS

□ Agencyoms is an automobile marketing campaign management CRM to manage campaigns and communication between Dealers and marketing staff. It is developed in Cakephp, I am Lead developer of this project

Ethizo

□ Complete EHR System provided on Web and mobile (IOS and Android) provided to providers and patient. Ethizo also offer online meeting functionality and Efax. I worked as a team member of Backend (PHP) team to create Rest API and Third Party Integration

Curves

□ Curves is a healthcare system considered one of the largest healthcare club of US and Canada. This system is PHP based using Cakephp as framework and frontend is developed in AngularJS which provide ease to interact doctor, counselor and patient. I was the main developer of this project worked on nutrition and admin area of the system

Accounts and Inventory Management System for Textile (Dyeing)

□ It was project in which I implement inventory management systems (Chemicals and Grey Receiving) and also accounts systems including Party ledgers, expense sheet, bills record, Payroll and balance sheet. It was implemented in PHP using framework of CakePHP

Patient Management System (Blick Clinic)

□ It was my individual project. It was a simple Patient Management System for a multi-team company implemented in CakePHP; this project contains supervisors view and admin view. I implemented google-map api also in this project which also shows direction between two points.
