Experience

Project Manager

Anchorstech

02/2024 - Present

Since February 2023, I have been working at "Anchorstech" where I lead a team of 10 developers and 2 Business Analysts. My responsibilities include overseeing the development of advanced EHR and PMS systems leveraging cutting-edge technologies, including AI, as well as managing projects and maintaining client communication. I am proficient in .NET Core, Angular 13+, and PHP.

AI Web Consultant

RemoteICU

Feb 2024 - Present

Contributed to the development of an AI-driven Decision Support System designed to assist ICU providers in managing Hypokalemia and Hypertension patients. Provided expertise in web technologies, data integration, and user-centric design to enhance real-time clinical decision-making and improve patient outcomes.

Assistant Project Manager

MedCare MSO

11/2022 - 02/2024

I worked as Assistant Project Manager of Maximus Team, which is complete Practice Management System. I am leading the team to develop Patient registration, Payment posting and Account Receivable module. In addition, I am hands on in .Net Core and angular 13.

Sr. Software Engineer:

AppifyTech

05/2014 – 11/2022

I worked as Lead Backend Developer in Appifytech for EHR application. In my experience, I worked in development of API for ePrescription, Problems, Allergies, Vitals and Encounter. Also I worked in Integration of API like IMO, Redox, eFax, surescript. Also I developed Z22 and Z44 message for Immunization submission to NIST Registry

Software Engineer

BinaryTech

06/2012 - 04/2014

As a software Engineer I developed Full Stack development in many project of Fitness Health Industry. I used CakePHP, Angularjs, bootstrap, jquery.

Semantic Notion:

Software Engineer

11/2010 - 06/2012

As Software Engineer I developed full stack app development including Web directories, Facebook Apps and Autoposts using wordpress, Cakephp and Facebook API

Zoniversal:

Software Engineer

07/2009 - 11/2010

As a software Engineer I developed Full Stack development in many project of Fitness Health Industry. I used CakePHP, Angularjs, bootstrap, jquery.

Projects:

Maximus

Complete PMS systems having all functionalities from patient scheduling to payment statement. I am leading project as APM helping team to achieve requirements and play role to bridge between Business Analyst and developer Team

HealUS

Complete Web based EHR System provided to providers and patient. HealUS also offer Developer Portal and FHIR. I worked as Assistant Project Manager and Lead C# and Angularjs Developer to develop critical modules and Third Party Integration

Ethizo:

Complete EHR System provided on Web and mobile (IOS and Android) provided to providers and patient. Ethizo also offer online meeting functionality and Efax. I worked as a team member of Backend (PHP) team to create Rest API and Third Party Integration

Curves:

Curves is a healthcare system considered one of the largest healthcare club of US and Canada. This system is PHP based using Cakephp as framework and frontend is developed in AngularJS which provide ease to interact doctor, counselor and patient. I was the main developer of this project worked on nutrition and admin area of the system

Accounts and Inventory Management System for Textile (Dyeing):

It was project in which I implement inventory management systems (Chemicals and Grey Receiving) and also accounts systems including Party ledgers, expense sheet, bills record, Payroll and balance sheet. It was implemented in PHP using framework of CakePHP

Patient Management System (Blick Clinic)

It was my individual project. It was a simple Patient Management System for a multi-team company implemented in CakePHP; this project contains supervisors view and admin view. I implemented googlemap api also in this project which also shows direction between two po
